

Barricade Seam and Repair Tape

A dependable, high-tack tape for sealing seams and making on-site repairs

HIGH TACK ADHESIVE
DEPENDABLE

**STRONG PE MESH
BACKING**
FOR DURABILITY

LINERLESS
HAND TEARABLE

MASONS
Designed Smart, Built Tough.

FOR SPEED & DEPENDABILITY

A fast-application, tearable tape designed for sealing membrane overlaps, repairing tears and punctures in building membranes, and general construction sealing. Its soft, pliable facer conforms to flexible underlays for excellent adhesion. The linerless design speeds up installation, reduces on-site waste, and the roll remains self-supporting without unravelling during application. Suitable for both indoor and outdoor use.

INSTALLATION

Apply to clean, dry surfaces and use firm, even pressure with a tape scraper or similar application tool to ensure full contact and best bond performance. Optimum application temperature: +10°C to +40°C.

PHYSICAL PROPERTIES

- 50mm x 50m roll
- 60 and 70mm wide options available by special order
- Liner-less, so easy to apply
- Hand tearable
- High tack adhesive
- Thick adhesive layer for improved surface contact
- Silicone release coating on the roll edges for easier handling

IMPORTANT

Barricade Seam and Repair Tape is designed for sealing overlaps and joints in wall wraps. It is not intended for use as a window flashing tape where multiple overlapping layers may be required.
